About Leather

Our leather is 100% premium Italian which has gone through all the tests. It is durable and flexible material created by tanning of animal raw hides and widely used in the furniture, home interior, aviation, automotive & various other industries. Our inventory includes ready-stock of the finest Italian leather and we strive to provide great value and savings every day. This means we only sell leather hides that meet or exceed industry standards along with excellent customer service.

Ordering

Leather can be ordered by the hide or by the square feet. The minimum order is one hide. Hides normally vary in size from 35 - 45, 45 - 65 square feet and are trimmed to minimise wastage. The colours of the hide may vary from batch to batch. The diagram represents the shape and size of a typical hide, do the electronic measuring 52 square feet / 4.83 square meter. A linear meter of 50"-54" fabric is equal to 18 square feet or 1.67 square meter of leather.

AN ITALIAN LEATHER TECHNOLOGY PROCESSING UNIT

AUTOMOTIVE

Premium range of genuine leather for car interiors, complying with the stipulated specifications and standards and is made with the best of Italian processing techniques. Also offers service for splitting the leather for special applications such as lamination printing. We have special articles for refractory (cool system), conditioned and dirt-resistant leather.

UPHOLSTERY

Full grain, half grain, and nubuck leather for furniture, hospitality, contract. Highly versatile products in a wide range of colours and textures. Our processing unit can cater demand of customised articles as well.

AVIATION - MARINE

Full grain, half grain, and pebble grain leather; a specific collection that ensures lightness, durability, fire and mechanically resistant properties. The research on materials, following the stipulated international standards, the attention to details and trends is at the core of Vinyork's manufacturing processes.
